ABSTRACT

This report provides tabular data on baccalaureate and higher degrees. Data were obtained from the survey of "Degrees and other Formal Awards Conferred Between July 1, 1970 and June 30, 1971" conducted by the U.S. Office of Education. Highlights indicated: (1) More than 1.1 million degrees were conferred at the bachelor's and higher levels in 1970-71 by 1,644 institutions of higher education in the U.S. (2) Publicly controlled institutions awarded 65% of the degrees in 1970-71 and 1969-70, up from 63% in 1968-69. (3) In 1970-71, publicly controlled institutions awarded 66% of the bachelor's degrees, 43% of the first-professional degrees, 66% of the master's degrees, and 65% of the doctor's degrees. (4) Men received 59% of all degrees in 1970-71 and 60% in 1969-70. (5) The largest discipline divisions, in terms of degrees conferred: 54% of all bachelors degrees were in education, social sciences and business and management; 57% of all master's degrees were in education, business and management, and social sciences; and 45% of all doctor's degrees were in education, physical sciences, and social sciences. (6) Elementary education had the highest number of degrees at the bachelor's and master's level; law, at the first-professional level; and chemistry, at the doctor's level. (7) All institutions to which the survey instrument was sent responded to the request for data. (Author/MJM)

HIGHLIGHTS

1. More than 1.1 million (1,147,985) degrees were conferred at the bachelor's and higher levels in 1970-71 by 1,644 institutions of higher education in the United States. This was an increase of 75,404 degrees (or about 7 percent) over the 1,072,581 awarded in 1969-70 by 1,617 institutions.

2. Publicly controlled institutions awarded 65 percent of the degrees in 1970-71 and 1969-70, up from 63 percent in 1968-69. The numbers of degrees awarded by these institutions showed 1-year increases of 9 percent in 1970-71 and 11 percent in 1969-70. For privately controlled institutions, the respective increases were 4 and 3 percent.

3. In 1970-71, publicly controlled institutions awarded 66 percent of the bachelor's degrees, 43 percent of the first-professional degrees, 66 percent of the master's degrees, and 65 percent of the doctor's degrees. In 1969-70, they awarded 66, 42, 65, and 64 percent, respectively.

4. Men received 59 percent of all degrees in 1970-71 and 60 percent in 1969-70. At the various degree levels, the proportions of degrees awarded to men have changed very little over the past 3 years.

5. For the largest discipline divisions, in terms of the number of degrees conferred:

   54 percent of all bachelor's degrees were in education (177,638), social sciences (156,698), and business and management (116,709).
   57 percent of all master's degrees were in education (89,667), business and management (26,654), and social sciences (16,522).
   45 percent of all doctor's degrees were in education (6,398), physical sciences (4,391), and social sciences (3,659).

6. In specific discipline specialties, elementary education had the highest number of degrees at the bachelor's and master's levels; law, at the first-professional level; and chemistry, at the doctor's level. The same field at each level has been reported as ranking first in each annual survey since 1964-65.

7. All institutions to which the survey instrument was sent responded to the U.S. Office of Education request for data. This is the third consecutive year in which a 100-percent response was obtained in this survey.

FOREWORD

This publication on earned degrees conferred by institutions of higher education in the United States is based on the survey instrument "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971," part of the sixth annual Higher Education General Information Survey (HEGIS). Data on earned degrees have been published regularly by the Office of Education since its first statistical survey for the academic year 1869-70.

The tables in this report provide data on baccalaureate and higher degrees. Detailed information on awards below the bachelor's level will be presented in a separate report entitled Associate Degrees and Other Formal Awards Below the Baccalaureate, 1970-71.

The continuing cooperation of the college and university officials in responding to this survey is most gratifying and appreciated.

INTRODUCTION

The data in this report were obtained from the survey of "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971" conducted by the U.S. Office of Education. This survey was part of the sixth annual Higher Education General Information Survey (HEGIS). Contained in this report are institutional and summary data on bachelor's and higher degrees. In each of the three immediately preceding survey years, institutional and summary data were presented in two separate publications. (Detailed information on awards below the bachelor's level is presented in a separate series, entitled Associate Degrees and Other Formal Awards Below the Baccalaureate.)

Included in the present publication are summary tables by level of degree, discipline specialty, sex of degree recipient, State, and control and level of institution. Comparisons are made with data for earlier survey years. There are also three tables containing data from each of the 1,644 institutions represented in the survey: One summarizes the degrees conferred by each institution, by level of degree and sex of student; the other two, which make up the bulk of this publication, list the number of degrees conferred within each discipline specialty at each institution, one at the bachelor's, master's, and doctor's levels and the other at the first-professional level. The data on intermediate degrees that have been gathered for the past 2 survey years (1969-70 and 1970-71) are also presented.

A copy of the portion of the 1970-71 report form (parts A and B) pertaining to bachelor's and higher degrees, together with definitions and instructions to respondents, is reproduced in appendix A. Also included in appendix A are data on intermediate degrees (page 28 of the report form). (Note.--The remainder of the report form (part C) concerns awards below the bachelor's level.) The totals shown in the data cells on the facsimile form are those obtained for the aggregate United States.

The sixth annual HEGIS, in 1971-72, which acquired these data for degrees awarded during 1970-71, was the first to utilize the new classification of fields of study published in A Taxonomy of Instructional Programs in Higher Education (OE-50064). (See appendix B for a reproduction of the material in that publication.) The Taxonomy has made extensive reorganization of the categories of data in such a way as to reflect the most common modern practices in institutions of higher education.

Survey data on bachelor's and higher degrees may be considered comparable for the years 1965-66 through 1969-70. When making comparisons for years before 1965-66, care must be exercised because degree levels were redefined for the 1965-66 survey. (For a detailed description of the differences between the 1965-66 survey and earlier surveys, see Earned Degrees Conferred, 1965-66 (OE-54013-66).

The introduction of the new field classification system beginning with the 1970-71 survey means that any comparisons with data for previous years should be made with care. A degree of comparability is possible through the use of a "translation table." However, the addition of new fields, together with the changed distributions and descriptions of fields formerly included, has changed the classification base to such an extent that in many cases significant comparisons would be impossible. For example, Trade or Industrial Training, which was an area of study in the 1969-70 survey (code 8000), is now shown under Engineering technologies (code 0925), as part of the discipline division of Engineering.

Instructions to the survey respondents (page 2 of the survey report form, appendix A) highlight the orientation of the classification structure. For discussion of the background and purposes of the Taxonomy, as well as for the translation table pertaining to HEGIS, see the reproduction of the Taxonomy (appendix B).

A description of the survey coverage and methodology used in preparing the HEGIS data is contained in another section of this report.

CURRENT TRENDS

Bachelor's and higher degrees conferred exceeded 1.1 million (1,147,985) in 1970-71 and were awarded by 1,644 institutions of higher education in the United States. This represents an increase of 7.0 percent (75,404) over the 1,072,581 degrees conferred by 1,617 institutions in 1969-70.

Bachelor's degrees increased 6.0 percent in 1970-71. This rate was below the 8.7-percent growth for 1969-70 and far below the 15.3-percent rise in 1968-69. Master's degrees increased 10.6 percent in 1970-71, compared with a 7.7-percent increase in 1969-70, and a 9.7-percent increase in 1968-69. Doctor's degrees showed a gain of 7.5 percent. This increase was considerably below the 14.1-percent growth in 1969-70 and the 13.4-percent gain in 1968-69. First-professional degrees increased 8.6 percent in 1970-71, a marked change from the 1.2-percent decrease in 1969-70 and the 2.7-percent increase in 1968-69.

Publicly controlled institutions awarded 65 percent of all degrees in both 1970-71 and 1969-70, and 63 percent in 1968-69. The total number of degrees awarded by these institutions in 1970-71 was 9 percent over the 1969-70 figure, and the number in 1969-70 was in turn 11 percent over the 1968-69 figure. In both 1970-71 and 1969-70, universities accounted for 56 percent of total degrees in publicly controlled institutions; "other 4-year," 44 percent. In 1968-69, publicly controlled universities awarded 58 percent of all degrees in publicly controlled institutions; other 4-year, 42 percent.

Privately controlled institutions awarded 35 percent of all degrees in both 1970-71 and 1969-70, and 37 percent in 1968-69. The total number of degrees in privately controlled institutions in 1970-71 was 4 percent over the 1969-70 figure, and those in 1969-70 were 3 percent over the 1968-69 figure. In 1970-71, universities accounted for 40 percent of total degrees in privately controlled institutions; other 4-year, 60 percent. In 1969-70 and 1968-69 the comparable percentages for privately controlled universities were 39 percent and 40 percent, respectively.

The question may arise as to whether increases in numbers of public institutions vs. private institutions are a factor in the relative rates of increase in number of degrees. This appears not to be the case in comparisons of 1970-71 data with 1969-70 data; there was approximately a 2-percent increase in both the public and private sectors in 1970-71 as compared with 1969-70. In 1969-70 as compared with 1968-69 the increase was 2 percent for the public and 1 percent for the private.

Publicly controlled institutions in 1970-71 awarded 66 percent of all bachelor's, 43 percent of all first-professional, 66 percent of all master's, and 65 percent of all doctor's degrees. In 1969-70, they were as follows: Bachelor's, 66 percent; first-professional, 42 percent; master's, 65 percent; and doctor's, 64 percent.

Men received 59 percent of all degrees in 1970-71 and 60 percent in 1969-70. At the various degree levels in 1970-71, the percents of degrees awarded to men and women remained quite similar to the figures for the 2 preceding years.

Level of degree	Percent of degrees awarded					
	1970-71		1969-70		1968-69	
	Men	Women	Men	Women	Men	Women
Total	59	41	60	40	60	40
Bachelor's	57	43	57	43	56	44

Master's	60	40	60	40	63	37
Doctor's	86	14	87	13	87	13

Data were obtained for 24 discipline divisions. Three of these together contributed more than half (54 percent) of all bachelor's degrees--177,638 in education (21 percent), 156,698 in social sciences (19 percent), and 116,709 in business and management (14 percent). At the master's level, 50 percent of the degrees came from two discipline divisions: education (89,067--38 percent) and business and management (26,654--12 percent). At the doctor's level 45 percent of the degrees were in three discipline divisions: education (6,398--20 percent), physical sciences (4,391--14 percent), and social sciences (3,659--11 percent).

This survey obtained data on 317 detailed discipline specialties within the 24 discipline divisions. The discipline specialties having the highest numbers of degrees, by level, were elementary education, with 90,970 at the bachelor's level and 17,079 at the master's level; law, with 17,652 at the first-professional level; and chemistry, with 1,953 at the doctor's level. These same discipline specialties have ranked first in each annual survey since 1964-65.

Over the past several years, members of the academic community and professional organizations have evinced a keen interest in the increased usage of "intermediate degrees" by institutions of higher education; that is, recognition (degree or certificate) for a program intermediate between the master's degree and the doctor's degree, which in essence is the doctor's degree without the dissertation. To obtain information on degrees at this level, which are not included in any other part of the survey instrument, an unstructured question on intermediate degrees was added to both the 1969-70 and 1970-71 survey instruments, with the institution reporting intermediate degrees by name of degree or certificate and the number of students receiving them.

In 1969-70 there were 3,274 intermediate degrees reported by 30 institutions in 22 States. In 1970-71, 47 institutions in 28 States awarded 4,609 intermediate degrees. Among the various types of intermediate degrees, both in 1969-70 and 1970-71, the candidate in philosophy was by far the largest category, being 80 percent (2,626) of all intermediate degrees represented in 1969-70 and 65 percent (3,014) in 1970-71. In viewing the rise in the use of intermediate degrees by institutions of higher education it is well to note that 1969-70 was the first year in which data on intermediate degrees were gathered, and for that reason alone the data may not be as reliable as those reported in 1970-71, the second year. Also, the instructions for reporting intermediate degrees changed. The doctor of arts degree was included as an intermediate degree in 1969-70 but was excluded in 1970-71. It was originally envisioned that the doctor of arts degree was more closely related to the intermediate degree (as was viewed in the 1969-70 survey instructions); but practice in the academic community, coupled with views held by professional societies and the established policy in graduate programs in the Office of Education, has moved in the direction of treating the doctor of arts degree as a traditional doctor's degree (as was done in the

1970-71 survey instructions). All of the intermediate degrees, other than the doctor of arts degrees reported in 1969-70, are presented in the one tabulation of intermediate degrees (table 10). The deletion of the doctor of arts degrees for 1969-70 from table 10 makes the data on intermediate degrees for 1969-70 and 1970-71 comparable.

SURVEY COVERAGE AND METHODOLOGY

Institutions Included

This report is based on data furnished by 1,644 institutions of higher education in the United States and outlying areas ("aggregate United States"). These constitute all of the institutions in the Office of Education's higher education survey universe that, as far as the Office of Education could determine, conferred bachelor's or higher degrees during the period from July 1, 1970, through June 30, 1971. The survey universe for earned degrees is based on the list of institutions included in the Education Directory, 1969-70, Higher Education (OE-50000-70), with such changes in the fall of 1970 as were known to the Office of Education. The questionnaire "Degrees and Other Formal Awards Conferred Between July 1, 1970 and June 30, 1971"--part of the sixth Higher Education General Information Survey (HEGIS)--was sent to all universities and other 4-year institutions in this universe. Each institution was requested to supply data in all applicable parts of the survey--data on bachelor's and higher degrees as well as on awards below the bachelor's level. (The present report is confined to data on bachelor's and higher degrees.) The Office of Education staff made extensive efforts to obtain a full response from every institution in the survey universe. Since each of the 1,644 institutions responded with complete survey data, it was unnecessary for the Office of Education to make any imputations or to provide any estimates for data by sex of student, level of degree, or discipline specialty.

The numbers of institutions in the 1970-71 survey of earned degrees were as follows:

Level of institution	Total	Control	
		Public	Private
All institutions	1,644	431	1,213
Universities	160	95	65
Other 4-year	1,484	336	1,148

There were 27 more institutions in this survey in 1970-71 than in 1969-70. Public other 4-year institutions added 7 institutions, while private other 4-year increased by 20. The number of universities in both the public and private sector remained the same for both years.

Collection of Data

In 1970-71 a major reorganization of the content of the survey was necessary to bring into use the new classification of discipline divisions and discipline specialties contained in the Taxonomy of Instructional Programs in Higher Education (OE-50064). (See appendix B.) A determined effort was made to provide institutions with both advance information and time to convert internal recordkeeping procedures to the new taxonomy categories. The taxonomy was the result of several years of effort in cooperation with the higher education community. The developmental work on the taxonomy included

extensive consultation and review. Preliminary copies for comment and criticism were sent to all colleges and universities in the United States, to a large number of educational associations and organizations, and to Federal agencies concerned with education. The final version was developed cooperatively by the National Center for Educational Statistics and the Bureau of Research, both of the U.S. Office of Education, and the National Center for Higher Education Management Systems at WICHE. Copies of the published taxonomy were made available to all institutions of higher education early in January 1971, and another copy was enclosed with the HEGIS package containing the 1970-71 earned degrees survey.

It is planned to use the Taxonomy in all HEGIS surveys for data acquired by academic field. The use of the Taxonomy will make all HEGIS surveys for data on instructional programs consistent with one another, thereby facilitating studies of the relationships of different types of data.

Verification of Data

To obtain complete and accurate data, the completed questionnaires were examined and analyzed, including review for compliance with the instructions to respondents. The data were further compared with available data reported by the respondents in questionnaires for previous earned degree surveys, taking into account the changes in the coding procedure as a result of the adoption of the taxonomy categories for instructional programs and using the table in the taxonomy which translates the fields of study used in the earlier surveys into the new coding system. Reference was frequently made to institutional catalogs and other materials for descriptions of programs and criteria. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of reported data. In some instances, when the number of degrees reported in any area was significantly larger or smaller than the number reported in the previous survey year, institutions provided explanatory information.

The instructions on the survey form request that the institutions classify degrees according to major field of study and to do so as specifically as the lists of specialties in the broad discipline divisions permit. For example, a student of educational psychology who is specializing in teaching the mentally retarded should be reported under "education of the mentally retarded" (code 0810), rather than in the somewhat broader category of "educational psychology" (code 0822) or in the broadest available category of "education, general" (code 0801). In practice, however, institutions can report data only to the level of detail provided in their individual recordkeeping systems. In some cases, therefore, readers may observe disparities between individual institutional programs as they know them and the manner in which they are shown in the institutional listings.

ORGANIZATION OF THE TABLES

The nine tables in this report have the same format as in the two 1969-70 reports, (Summary Data and Institutional Data), this year combined as one report. Separate counts are given by sex of student in all tables; other classifications vary from table to table.

Tables 4, 5, 6, 8, and 9 deal with discipline division and discipline specialty (formerly called area of study and field of study) and contain the new classification of instructional programs in accordance with A Taxonomy of Instructional Programs in Higher Education (appendix B). The reader should consult the translation table in the taxonomy when using these data based on the old and new coding systems. The remainder of the nine tables in this report--tables 1, 2, 3, and 7--are not affected in any way by adoption of the taxonomy.

Table 1 is a brief historical comparison of degrees conferred, by level of degree, from 1965-66 through 1970-71. Table 2 is a summary of the degrees conferred in 1970-71, by level of degree and control and level of institution. In this table, data are presented separately for universities and for other 4-year institutions. Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year" group. Tables 3, 3A, and 3B show State data for each of the degree levels. Table 4 gives bachelor's, master's, and doctor's degrees by discipline division. Table 5 shows the same information as table 4 by discipline specialty within discipline divisions. Table 6 presents data on first-professional degrees conferred in eight selected discipline specialties. Table 7 summarizes degrees conferred by each institution in the survey, by sex of student and level of degree; totals by State are also shown in this table. Table 8, which forms the bulk of this publication, gives the number of degrees conferred at the bachelor's, master's, and doctor's level in each discipline specialty by each institution. The institutions are listed alphabetically by State. Table 9 presents a similar listing for first-professional degrees. Table 10 summarizes intermediate degrees conferred in each of the two years for which such data were gathered, 1969-70 and 1970-71.

The following breakdowns of data may be obtained from the tables noted:

Note.--The instructions for reporting doctor of arts degrees were different in 1970-71 than in 1969-70. The doctor of arts degree was included as an intermediate degree in 1969-70 but was excluded in 1970-71. In the above table the 19 doctor of arts degrees reported for 1969-70 were deleted to make the data on intermediate degrees for 1969-70 and 1970-71 comparable. These 19 doctor of arts degrees were not included in the doctor's degrees presented in any of the tabulations of the 1969-70 survey report.

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: *(1)* an institution having two or more campuses responsible to a central administration *(which central administration may or may not be located on one of the administratively equal campuses)* or *(2)* an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus *(sometimes called the parent institution)* is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis *(i.e., has a relatively permanent administration)*, which offers an organized program or programs of work of at least 2 years *(as opposed to courses)*, and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

SURVEY COVERAGE

This report is divided into 3 parts.

PART A is concerned with first-professional degrees only.

PART B is concerned with bachelor's, master's, and doctor's degrees.

PART C is concerned with awards below the bachelor's level *(Associate in Arts degrees and other formal awards).*

Many institutions will appropriately skip one or more of the 3 parts. If a particular part *(A, B or C)* does not apply to you, please indicate that fact and forward that part to us along with those you did complete.

NOTE: Listings of data for individual institutions are regularly included in published reports of this survey.

SEPARATE SPECIFIC INSTRUCTIONS ARE PROVIDED FOR EACH OF THE 3 PARTS.

NEW CLASSIFICATION OF MAJOR FIELDS OF STUDY

Introduced into the degrees survey this year is the new Taxonomy of Instructional Programs in Higher Education, the result of several years of intensive effort in cooperation with the higher education community. A major reorganization of the content of the survey was necessary in order to take advantage of the new classification of discipline divisions and discipline specialties. The purpose was to attain a standard system, in tune with current practice, which is comprehensive and flexible enough for a wide variety of institutional uses and survey programs related to higher education.

The developmental work on the taxonomy included extensive consultation and review. Preliminary copies for comment and criticism were sent to all colleges and universities in the United States as well as to a large number of educational associations and organizations and to Federal agencies concerned with education. The final version was developed cooperatively by the National Center for Educational Statistics and the Bureau of Research, both of the U. S. Office of Education, and the Western Interstate Commission on Higher Education.

Copies of the published taxonomy have been made available to all institutions of higher education. The publication reference is:

> U. S. Department of Health, Education, and Welfare, Office of Education, National Center for Educational Statistics. *A Taxonomy of Instructional Programs in Higher Education.* By Robert A. Huff and Marjorie O. Chandler, OE-50064-70. Washington: U.S. Government Printing Office, 1970. Price $ .45.

In addition to the classification system itself, the publication provides an alphabetized index of discipline specialties, and four "translation" tables relating the taxonomy to other or previous classification systems. The translation table which applies to the present survey is Table 1, "HEGIS Degrees and Other Formal Awards Conferred Between July 1, 1968, and June 30, 1969." Table 1 relates item numbers in the 1968-69 survey to the taxonomy code numbers to be used beginning with the present 1970-71 survey. The user may be guided by these translations, but his dominant orientation should be in the direction of classifying degree programs in such a way as to reflect their content accurately in terms of the structure of the new survey form.

The Office of Education is ready to cooperate in every way possible to facilitate the transition to the new classification and to discuss any problems which may arise.

GENERAL INSTRUCTIONS

1. INCLUSIVE DATES. Report only those degrees *(including awards in Part C)* which were actually conferred between July 1, 1970 and June 30, 1971. Degrees earned but not yet conferred during this time period should be reported in next year's survey.

2. INSTITUTIONAL COVERAGE. A separate report is requested from each branch or member of a system, as well as from each entirely independent institution and each "parent" institution. Please provide the information requested in item 6 on the cover page, which is intended to permit complete identification of the reporting unit. **Do not** include degrees conferred by branches of your institution located in foreign countries.

3. CONSULTATION ON PROBLEMS. If clarification of the definitions and instructions is needed, please consult the survey director, Mrs. Mary Evans Hooper, National Center for Educational Statistics, U. S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Or you may reach Mrs. Hooper by telephone: (202) 962-7301.

4. RETURNING FORMS. Completed report forms should be addressed: Attention: Room 2136-HEGIS, National Center for Educational Statistics, U. S. Office of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

5. MAJOR CHANGES. **If the number of degrees you report in any area is significantly larger or smaller than the number you reported last year, it will be most helpful if you will include explanatory notes on the form or on an accompanying sheet of paper.** Please indicate by circling the "line number" in column 3 if degrees were conferred *for the first ime* in 1970-71 in a discipline specialty new to your institution.

6. Please verify your entries and check all the addition before returning the form.

7. SEPARATE SPECIFIC INSTRUCTIONS ARE PROVIDED FOR EACH OF THE 3 PARTS.

NAME OF INSTITUTION | 1. INSTITUTION CODE NUMBER

INSTRUCTIONS FOR PART A: FIRST-PROFESSIONAL DEGREES CONFERRED IN SELECTED FIELDS

Only the 8 professions listed below should be reported in Part A. Within these professions, report **first-professional** degrees only. A first-professional degree is defined herein as one which meets all three of the following criteria: (1) it signifies completion of the academic requirements to begin practice in the profession; (2) it is based on a program which requires at least 2 years of college work prior to entrance; and (3) a total of at least 6 academic years of college work is required to complete the degree program, including prior required college work plus the length of the professional curriculum itself.

The "Other" category is to be used only in the event that there are first-professional degrees within the 8 professions other than those specifically named in connection with those professions.

Please note that the 8 disciplines have been grouped in Part A for convenience in analysis; in the Taxonomy listing they appear in the numerical sequence indicated by their code numbers.

For each of the 8 disciplines, degrees other than first-professional are to be reported in Part B.

The TOTAL line (line 14) should show the sums of all entries in columns 4 and 5.

INSTRUCTIONS FOR PART B: BACHELOR'S, MASTER'S, AND DOCTOR'S DEGREES

1. TYPES OF DEGREES. Report **earned** bachelor's, master's, and doctor's degrees, except for those first-professional degrees reported in Part A. Report certificates and diplomas if they are equivalent to a bachelor's degree and if they are based on at least 4 years of college work.

Do **not** report honorary degrees.

Certificates for work between the master's degree and the doctor's degree should be separately listed at the end of Part B. See 5(d) below.

(Report Associate in Arts degrees or similar awards below the bachelor's level in Part C.)

2. GROUPING OF DISCIPLINES. The major fields of study to be reported here, classified in accordance with Section I of the Taxonomy of Instructional Programs in Higher Education, fall in the following discipline divisions:

0100 Agriculture and Natural Resources	1300 Home Economics
0200 Architecture and Environmental Design	1400 Law
0300 Area Studies	1500 Letters
0400 Biological Sciences	1600 Library Science
0500 Business and Management	1700 Mathematics
0600 Communications	1800 Military Sciences
0700 Computer and Information Sciences	1900 Physical Sciences
0800 Education	2000 Psychology
0900 Engineering	2100 Public Affairs and Services
1000 Fine and Applied Arts	2200 Social Sciences
1100 Foreign Languages	2300 Theology
1200 Health Professions	4900 Interdisciplinary Studies

3. SKIPPING INAPPLICABLE DISCIPLINES. Skip those discipline divisions in which your institution does not grant degrees. Many registrars, for example, will skip one or more of the following: 0100; 1200; 1800; 2300.

4. NUMBER OF DEGREES. Report all degrees (within the limitations of paragraph 1, above). If a student earned two degrees between July 1, 1970 and June 30, 1971 (e.g., a bachelor's degree at the end of the summer session and a master's degree at the end of the following academic year), report each of the two degrees in its appropriate classification.

5. DEGREE LEVELS.

(a) Report all BACHELOR'S DEGREES requiring at least 4 but not more than 5 years of academic work in Columns (4) and (5) of the report-form. Also, report ALL bachelor's degrees conferred in a COOPERATIVE or WORK-STUDY PLAN or PROGRAM in Columns (4) and (5). A cooperative plan provides for alternate class attendance and employment in business, industry, or government; thus, it allows the student to combine actual work experience with his college studies.

(b) MASTER'S DEGREES. The master's degree in liberal arts and sciences is the degree customarily granted upon successful completion of one *(sometimes two)* academic years of work beyond the bachelor's degree.

Except for the Master of Divinity degree (Part A), report all master's degrees in Part B, Columns (6) and (7) *(even though the master's is required in some fields, such as Library Science Hospital Administration, and Social Work, for employment at the professional level, and even though, as in the case of Social Work, 4 years of undergraduate work are required for entrance into the program and an additional 2 years for completion.)* Report Education specialist (6-year degree) in same columns as master's degrees, in appropriate discipline specialty in Education (0800).

(c) DOCTORATE. The doctorate classification includes such degrees as Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and the Ph.D. degree in any field whether Agronomy, Food Technology, Education, Engineering, Public Administration, Ophthalmology, Radiology, etc. *(In the case of the Doctor of Public Health, the prior professional degree is generally earned in the closely related professional field of medicine or of sanitary engineering.)* Please report the doctor's degrees *(except those included in Part A)* in Columns (8) and (9) of the report-form.

(d) OTHER DEGREE OR CERTIFICATE. If your institution provides any recognition *(degree or certificate)* for a program intermediate between the master's degree and the doctor's degree *(Ph.D., Ed.D., etc.)* which in essence is the doctor's degree without the dissertation *(for example, Master of Philosophy, Candidate-in Philosophy, etc.) (do not include 6-year specialist degrees)*, please report the name of the degree or certificate and the number of students receiving it in the item at the end of Part B *(after Item No. 9800.) (Do not include in the tabulated figures for Bachelor's, Master's, and Doctor's degrees in the report-form.)*

6. CLASSIFICATION OF DEGREES ACCORDING TO MAJOR FIELD OF STUDY.

(a) Specific Classification. Classify degrees as specifically as the list of specialties in the broad discipline divisions of the report form permits. Thus, report a bachelor's degree in business administration with an accounting major in Accounting (0502), NOT in Business and commerce, general (0501).

(b) Degree of Doctor of Philosophy. Classify the Doctor of Philosophy degree according to the student's major field of study. Thus, a Ph.D. in Chemistry should be reported as a degree in Chemistry, NOT as one in Philosophy.

(c) Majors of Students Prepared to Teach. The general rule is to classify degrees according to the major area of specialization. This means, in general, that degrees of students who have prepared to teach an academic subject, such as English, biology, mathematics, or foreign languages, should be reported as appropriate in Letters, Biological Sciences, Mathematics, and Foreign Languages and NOT in Education. On the other hand, the degrees of students who have prepared to teach such special subjects as agriculture, art, music, etc. should be reported in Agricultural education (0899-1), Art education (0831), and Music education (0832).

(d) Split and Double Majors. When a student graduates with a split major or a double major – e.g., in Spanish and French – report the degree either in the area of greater specialization or as half a degree (.5) in French and half a degree (.5) in Spanish. *(If the split or double major involved Spanish and an unlisted language, the second language should be reported in Other, specify (1199)).* Similarly in the case of a student with a split or double major in Biology and Chemistry, report the degree in the area of greater specialization or as (.5) degree in Biology and (.5) degree in Chemistry.

(e) Unlisted Fields of Study. When classifying a specialty which does not seem to fit into the list, the institution has two choices: (1) it can be listed by name under "other" if it represents an unlisted specialty, or (2) it can be placed in a "general" category if it covers several listed specialties.

(f) General Majors. The term general major is used to designate diversified curriculums within an area of study. Ordinarily, degrees based on a general major should be reported in one of the general categories of the report-form, such as Physical sciences, general (1901); Social sciences, general (2201); Humanities and social sciences (4903), etc. Thus a degree based on concentration in History-Government-Economics should be reported in Social sciences, general.

(g) Interdisciplinary Studies. Code 4999 is for reporting fields of study which represent two or more broad discipline divisions; for example, Mass Communications, encompassing segments of psychology, education, business, journalism, social sciences, fine arts, etc., should be reported here. Specify the name of the interdisciplinary study when reporting in 4999.

(h) **Before submission, please verify that the specialty subtotals (for example, lines 22, 33, and 52, etc.) are the sum of the specified preceding lines for every column (columns (4) through (9).**

A TAXONOMY OF INSTRUCTIONAL PROGRAMS IN HIGHER EDUCATION

This appendix presents the contents of an earlier Office of Education publication of the same name issued as publication number OE-50064 and Superintendent of Documents Catalog No. HE 5.250:50064, U.S. Government Printing Office, Washington: 1970. The original edition was prepared by Robert A. Huff, Western Interstate Commission on Higher Education, and Marjorie O. Chandler, National Center for Educational Statistics. The publication is reproduced here, with appropriate alterations in format, page numbers, etc., for the convenience of readers who need more complete information than provided in the main sections of this report on the conversion of data to the new instructional programs of the Taxonomy, as introduced in the present survey in the continuing series on Earned Degrees Conferred.

FOREWORD

SINCE THE Higher Education General Information Survey package was first assembled from disparate periodic survey forms of the Office of Education in 1966, it has been apparent to the National Center for Educational Statistics and to the higher education community that the various lists of higher education instructional programs in the HEGIS packages needed to be revised to bring them in line with the best current practice and to make them consistent with each other. This publication responds to that need.

The taxonomy of instructional programs will be used in the HEGIS surveys of 1971-72, and all subsequent surveys whenever the data are acquired on the basis of instructional programs. This will include the future surveys of earned degrees and other formal awards, enrollment for advanced degrees, upper division enrollment by major, field of training of faculty, instructional program assignments of faculty, expenditures by instructional program, etc. Because the translation of current records on physical plant space presents some unusual difficulties, present plans contemplate no survey of the allocation of physical plant space by instructional program again until the fall term of 1974.

This taxonomy represents an effort to prescribe not how instructional programs should be organized but how the majority of institutions of higher education actually do organize and record data on instructional programs. At the same time, it attempts to reflect categories for which data are needed. Every institution, association, and professional organization in higher education was asked to assist in the development of this taxonomy, and every comment and suggestion was reviewed and evaluated.

In another form, this taxonomy has been adopted as the core portion of the Program Classification Structure developed by the Western Interstate Commission for Higher Education's Management Information Systems Program (WICHE-MIS), and will be essential for use of the WICHE-MIS standard models and cost exchange procedures.

The present report is being published far in advance of its first prospective use in 1971-72 in order to provide a maximum lead time for any change of institutional records deemed necessary. According to current plans, this taxonomy will not be modified in any major way (apart from the addition of new instructional programs) during the ensuing 5-year period in order that institutions and other agencies may receive a maximum return from the time and effort expended in the construction or modification of file systems. The continued provision of criticism and comment is encouraged both to assist us in minor modifications and to help us prepare for eventual major revision.

INTRODUCTION

BACKGROUND

MANY MEMBERS of the higher education community have recommended modification and updating of the list of discipline specialties in the Higher Education General Information Survey (HEGIS) questionnaires. Moreover, they have urged that the list be made sufficiently flexible and comprehensive for adaptation to overall institutional recordkeeping, apart from HEGIS reporting. This revision—incorporating the suggestions—has the following specific objectives:

1. To produce a list of instructional programs that would be equally applicable to HEGIS data on students, faculty assignments, finance, and space.
2. To reflect as accurately as possible the instructional programs and curriculums now in existence or likely to appear in the future.
3. To build enough comprehensiveness and flexibility into the list so that it may remain relatively stable.
4. To construct a list which is acceptable and practical for general institutional recordkeeping, for management information systems, and for program budget structure employed by higher education institutions.
5. To provide a system for translating records based on old coding procedures (e.g., the Higher Education Facilities Classification) into the new specialty list.

The standard list of instructional programs presented in this publication was developed cooperatively by the National Center for Educational Statistics and the National Center for Educational Research and Development (both of the Office of Education), and the Western Interstate Commission on Higher Education.

A crucial feature in the development of the standard list was a comprehensive review process involving all sectors of the higher education community—Federal agencies concerned with statistical data on higher education, institutions of higher education, and higher education associations and organizations. The review process began in the spring of 1969 when a preliminary draft of the list was circulated to a number of persons in the higher education community; in addition, field visits were made to a sample of institutions for discussion of the list. Comments generated by the first review cycle provided a basis for a revision that was developed by a committee made up of representatives of the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council of Graduate Schools in the United States, together with representatives of the Office of Education and the Western Interstate Commission. The resulting draft was then sent to Federal agencies, to education associations and organizations, and to *all* institutions of higher education. The final version presented here reflects not only comments volunteered by the numerous reviewers but also the outcome of a series of meetings with representatives of other Federal agencies.

After the standard list itself had been developed, the final step was to construct the index and the translation tables. The translation tables show the relationship of the new system to the systems used in the HEGIS Earned Degree survey, the Higher Education Facilities Classification, the Vocational Education and Occupations classification systems, and the U.S. Bureau of the Budget Standard Classification of Fields of Science and Engineering.

A VIEW OF THE INSTITUTIONAL REPORTING TASK

No centrally prepared list can precisely match the pattern of discipline titles and content within all institutions. Despite institutional variations, the new list is designed to contain a definite place for *every* specialization needed for classifying students, faculty assignments, finance, and facilities. To the extent that the list attains this objective, institutions may also find it useful for their own records systems even though it is not a "perfect fit."

Each institution, then, will interpret its own programs in terms of the new HEGIS list and translate its own titles into HEGIS terminology. For example, what one college calls "biostatistics" may be judged comparable to "biometrics" on the HEGIS list. Some institutions may find it convenient to record their own discipline codes next to the HEGIS codes in the index.

Once the proper reporting category has been decided for each degree program that an institution offers, the preparation of HEGIS reports should be quite simple. For example, each student's major field, each faculty member's teaching assignments, and each space allocation could be coded according to the discipline specialization list and the codes stored in the institution's regular data file. Then, by a fairly routine clerical operation (or a simple computer program), HEGIS and other reports could be compiled from institutional files. If an institution has kept its records in accordance with the old HEGIS codes (or with one of the other systems covered by the translation tables), conversion to the new system should be quite straightforward.

It should be recognized that a particular faculty member, student, or facility may require several codes for complete identification. For example, a faculty member may have a series of degrees, each in a different field; he may be assigned by the institution to work in some other field; and he may consider that his primary research competence is in still another field.

In attempting to use the new HEGIS list, the user is urged to "browse" through the entire list to see how the discipline specialties have been ordered. Such browsing will serve at least two purposes: first, to identify substantial portions of the list that may be ignored by a particular college and, second, to avoid classifying a program into a semiappropriate category near the start of the list when there is a more appropriate category further along.

THE DISCIPLINE CLASSIFICATION

The new HEGIS classification is divided into two main sections. Section I deals with conventional academic subdivisions of knowledge and training; section II, with technologies and occupation specialties related to curriculums leading to associate degrees and other awards below the baccalaureate.

Within the two sections, each discipline *division* is shown in bold type at the beginning of each specialty list, along with a brief definition. Under the discipline division are listed the discipline *specialties*. It should be noted that the discipline specialty list is not intended to be a list of individual courses.

Inevitably, the decision that certain specialties belong under one division rather than another is somewhat arbitrary; some users will disagree with certain classifications. For example, one institution may classify botany under agriculture and another may classify it under biological sciences; economics may be classified under business and commerce or under social studies. The important point is that data can be reported in the appropriate, specific category. The user who wishes to aggregate in a manner other than that implied by the HEGIS discipline division may then do so.

The first title under most of the discipline divisions is listed as a *general* category. This is intended to provide some flexibility in the reporting scheme and should be useful for broad programs that encompass several of the listed specialties.

When attempting to classify an individual or a facility which does not seem to fit into the list, the institution has two choices: (1) it can be listed by name under "other" if it seems to represent an unlisted specialty, or (2) it can be placed in the "general" category if it seems to cover several listed specialties. Such fine points must be decided at the institutional level, but it is hoped that the index is comprehensive enough to minimize the need for such decisions.

THE INDEX

To satisfy the many purposes for which the taxonomy is intended, it must be very lengthy and diverse. To make it easier to use, it is followed by two alphabetical indexes of program titles—including a number of related titles not appearing in the discipline classification—showing the discipline category in which the item should be placed. The first index applies to the conventional academic subdivisions of knowledge; the second, to technologies and other occupational specialties related to curriculums leading to associate degrees and other awards below the baccalaureate.

THE TRANSLATION TABLES

The tables on pages 21–32 of this publication provide a means for translating into the new coding system from:

1. The list of academic specialties used in the HEGIS survey of degrees awarded in 1968–69. Essentially the same list was used in the HEGIS survey of Students Enrolled for Advanced Degrees.
2. The Standard Classification of Organizational Units and Subject Fields, from the Higher Edu-

cation Facilities Classification and Inventory Procedures Manual.

3. The list of technical education programs from *Vocational Education and Occupations,* published by the U.S. Office of Education and the U.S. Department of Labor, Manpower Administration.
4. The U.S. Bureau of the Budget Circular A-46, Standard Classification of Fields of Science and Engineering.

In reviewing the translation tables, it will be noted that the new list provides coverage of all specialties included in the four documents cited above. In many instances, the new list provides for much greater specificity of reporting than the old systems. For example, the HEGIS Earned Degree list uses a single code (7710) for area studies; by comparison, area studies involves 15 different codes in the new list, with separate codes for East Asiatic studies, Islamic studies, Russian and other Slavic studies, and so forth. Similarly, BOB Circular A-46 provides only a single code for chemistry as compared with five in the new list (organic chemistry, physical chemistry, general chemistry, and so forth).

CODING

It will be noted that, within the discipline divisions, the lists of discipline specialties have been arranged without strict adherence to alphabetical or other logical sequence. This is done purposely: any additions to the lists during the next few years can be made without disturbing the coding sequence or the rationale of the listing arrangement. Furthermore, this system purposely avoids arbitrary organizations of fields into questionable and potentially controversial hierarchies of subfields and sub-subfields within a discipline division. Thus, avoidance of a logical sequence for the discipline specialty lists is deemed desirable and actually becomes the rationale for the arrangement.

A block coding scheme has been used in this taxonomy. The first two digits of the four-digit code identify the discipline division. Numbers 01 through 49 are used for identification of the conventional academic fields of section I. Numbers 50 and above are used as the first two code digits to identify the technologies and vocational specialties of section II. Under all discipline divisions, the last two digits of the code are used to identify the specialties.
